JANUS

INTERNATIONAL
ROLLING STEEL DIVISION

The Janus International Rolling Steel Division manufactures a complete line of commercial and industrial rolling steel doors, including medium duty service doors, full duty service doors, fire doors, insulated doors, fire shutters and counter shutters. Our doors are manufactured combining state-of-the-art equipment with time proven engineering standards to ensure the highest quality, reliability and customer satisfaction. Our exclusive warranty attests to our commitment to superior workmanship which stands behind each Janus commercial door product.

The Janus ColorFast™ powder coating system is offered as an option. Standard powder coat colors come in 107 choices, with most custom colors also available. Please refer to our Options Price Sheet for pricing information, or contact your regional sales manager.

proud member of:

DASMA #274 states that "a common occurrence with rolling steel door products, under normal usage of such products, is the wearing away of the painted surface of the curtain. This condition occurs as the result of the curtain repeatedly coiling upon itself, and then repeatedly uncoiling, upon the opening and closing of a rolling steel door". Therefore normal wear and tear from metal to metal contact is not covered under the Janus paint warranty.

revised 5/10

About Janus ColorFast™ Powder Coating (provided by TIGER Drylac)

TIGER Drylac Highly Weather-and UV-Resistant Powder Coatings are based on Super Durable TGIC Polyester for exterior and interior applications.

Features: Superior gloss and color retention, excellent weather resistance, good mechanical properties, superior chalk resistance, smooth flow, excellent edge coverage, good storage stability. AAMA 2604-05 conforming.

Gloss Level: All colors featured in this chart are available as standard products in smooth glossy with a gloss level of 80-90 (gloss level according to Gardner 60 deg., ASTM D 523).

Standard Colors: Only colors with the * symbol are Super Durable Polyester with UV protection and are considered "standard" Janus International paint items. For any other colors on this chart, please contact our factory or your sales manager for pricing and lead times.

Custom Colors: For custom colors not shown in this brochure, please call our factory. Due to pigmentation, some colors in the yellow, orange, red and purple range offer only limited UV stability and are therefore not available.

The RAL colors in this chart have been matched as closely as possible. Color chart production methods and influence from heat and light may account for slight color deviation from the actual RAL Standard. This chart therefore cannot serve as a standard for RAL color production and is to be used as a guide for color planning and specification only.

When specifying TIGER Drylac colors, please use the full number rather than using the RAL number only. The full number indicates the color, series, chemistry, finish and sheen.
