# nokē**PRO**

Nokē smart-locking hardware secures thousands of sites across the globe. The Nokē PRO platform lets you control locks, manage users, track data and so much more, even when you are off site.

Through an easy to use mobile app, and cloud-based, web dashboard, the Nokē Platform has created a new standard in enterprise-grade security and safety. Now, all your locks are connected, on-line, and working together seamlessly. Our platform is scalable, secure, can be integrated into your existing software, streamlines access control management, and most importantly- and puts you in control.

NOKĒ PRO SOLUTION: FROM YOUR DESKTOP COMPUTER

From your desktop computer desktop Nokē PRO utilizes a desktop software application that allows you to view and control where, when, and by whom locks are being used from anywhere in the world.

TRACK DATA & ACTIVITY
- View lock activity in real-time
- View lock and user history
- Track locks and create geofences
- Monitor/manage audit trails
- See all active locks
- See lock activity according to time

CONTROL LOCKS
- Open some Nokē lock types
- Add and manage all locks
- Issue Bluetooth enabled fobs
- Create Quick-Click Codes
- Set and adjust all user permissions
- Export activity reports

MANAGE ACCESS & USERS
- Create users and groups
- Customize access permissions
- Send notifications
- See/manage user and group activity

NOKĒ PRO SOLUTION: FROM YOUR SMART DEVICE

With the Nokē mobile app, your phone or smart device is the key.
Say goodbye to the days of key rings, copying keys, re-keying locks, combinations, key card management, and the time, money and productivity, lost to traditional key management.

TRANSFORMER
GATE #2100

UNLOCK

THE BENEFITS OF SMART ACCESS CONTROL

noke

Nokē Smart Locks are engineered with the technology to eliminate access control complexities, and get all your locks connected, on-line, and working together seamlessly.

BLUETOOTH
Control all smart-locking hardware from any Bluetooth-enabled smart device

SCALABLE
Flexible and scalable computing capacity to support business growth

SECURE
Products are built with the highest level data security, compliance and privacy standards

CUSTOMIZABLE
Supports faster experimentation, updates, and customized applications

REAL-TIME
Locks, app, and web portal are synchronized in real-time to provide up-to-date information

SIMPLE DATA ANALYSIS
Analyze and record data for patterns, predictions, trends, and boosting operational success

API INTEGRATION
Nokē's integration solution positions Nokē as the only industrial lock manufacturer that can seamlessly plug into customers existing platforms, apps, data, and analytics, and create a network effect of systems working together.

CLOUD-BASED
The Nokē security platform utilizes the power of cloud technology. Cloud capabilities offer numerous opportunities to drive business innovation, increase business value, and boost connectivity.

THIRD-PARTY TESTED
The Nokē system has passed rigorous third-party testing

PIONEERING SMART ACCESS CONTROL ACROSS THE GLOBE

Millions of companies use billions of locks daily. Controlling these locks, staying compliant with safety and security regulations, and keeping assets and employees secure, is time consuming, expensive and frustrating.

Nokē is transforming, streamlining and simplifying access control on gates, entry points, tool cabinets, valves, lockers, trucks and trains, self-storage, and beyond. Technicians and all stake holders open locks from their phones, managers have 100% visibility and control of the locks from anywhere, and everyone feels the benefits of the Nokē Smart-locking Security Platform.
