STANDARD FEATURES

Pre-Lubricated Springs: During production, springs are factory lubricated and enclosed in a tube to protect them from the environmental elements.

Dead Axle & Barrel Assembly: An enclosed spiral barrel houses the dead axle assembly and offers durability and smoother operation as weight is distributed throughout the barrel.

Ratchet Tensioning Device: The tension wheel's eight adjustable positions let you fine-tune both springs simultaneously, ensuring equal pull on each side for smooth, balanced door operation.

26-Gauge Corrugated Door Curtain: Manufactured from galvanized grade-80 steel and coated with super-durable polyester paint in more than 30 color options.

Metal Windlocks: 12-gauge provides strength and security. Windlocks do not come in contact with guides.

Insulated Version Available: Side and top draft stops included.

The **1100 Commercial Series** from Janus International is a durable, economical solution for light-duty commercial applications. With pre-assembled brackets and a factory-installed tensioner, the 1100 Series roll-up door installs quickly and delivers long-lasting performance. Built to meet wind-load certification standards, this model is ideal for coastal environments and regions prone to extreme weather.
